PROFILE

AI & Automation Specialist with 7+ years of operations background. I automate the processes I used to run myself — with Claude Code, self-hosted n8n on my own Hetzner/Coolify infrastructure and LLM integration. I can tell where AI offers real leverage, where lean automation is enough, and where human judgement decides.

No code for code's sake. Code that solves business problems.

- **7+ years of real business processes** in HR, Office & Accounting (Remote, Redfish, CS Compliance)
- **Full stack sovereignty** – Hetzner + Coolify + n8n + PostgreSQL, no vendor lock-in
- **Proven:** AZAV-certified AI training, all modules completed with distinction
- **Teaching in my DNA:** I enable non-technical people to use AI themselves

TECHNICAL SKILLS

AI & Automation

Claude Code · n8n (self-hosted) · AI Agents · Workflow Automation · VibeCoding · Prompt Engineering

APIs & Integrations

REST APIs · Webhooks · JSON · Node.js (n8n runtime + code nodes) · Google APIs (Gmail / Drive / Docs) · Mistral · Telegram · Cal.com · HubSpot · Cloudinary

Infrastructure & Tools

Docker · Coolify · Hetzner VPS (DE) · GitHub · SSH · macOS · PostgreSQL · NocoDB

AI & Productivity Tools

Claude (Anthropic) · Mistral · Langdock · ChatGPT · Perplexity · Custom GPTs · NotebookLM

Business

Process optimisation · HR Operations · Documentation · Audit trail · Human-in-the-loop logic

SELECTED PROJECTS (2026)

n8n Node Explorer — live on ninalearnsvibecoding.com

Interactive search & filter tool for **1,490+ n8n nodes and aliases**: full-text search with highlighting, filter logic for Trigger / Core / AI nodes, offline-capable.

Technologies: HTML · JavaScript · JSON · n8n structure data

Self-Hosted AI Workflow Environment

Built and operated a self-hosted n8n instance on Hetzner/Coolify: API integrations, workflow orchestration, AI agent logic, automated process chains, Claude-Code-based automation.

Technologies: n8n · Docker · Coolify · Hetzner · PostgreSQL · NocoDB

AI Application Workflow

3× daily job scraping → LLM scores & personalises → Telegram approval → own SMTP send-out → NocoDB logging.

Technologies: n8n · Mistral · Telegram · SMTP · NocoDB

Live Application Dashboard

Personalised pages per company, with page-visit tracking, QR code and Cal.com embed.

Technologies: Claude Code · n8n · Coolify · Cal.com

AI QUALIFICATIONS

Module 3 – n8n AI Agents & VibeCoding · AZAV-certified AI training

04/2026 – 05/2026

88/90 points · excellent

Module 2 – AI Consultant · AZAV-certified AI training

03/2026 – 04/2026

340/360 points · distinction

Final project FEMhit: enterprise AI advisory concept incl. EU AI Act risk classification, DPIA & DPA, responsibility matrix, KPI framework and 4-phase rollout plan.

Module 1 – AI Analyst · AZAV-certified AI training

02/2026 – 03/2026
